

Catholic Charities of California Poverty Data for Catholic Charities of Santa Rosa December 2011

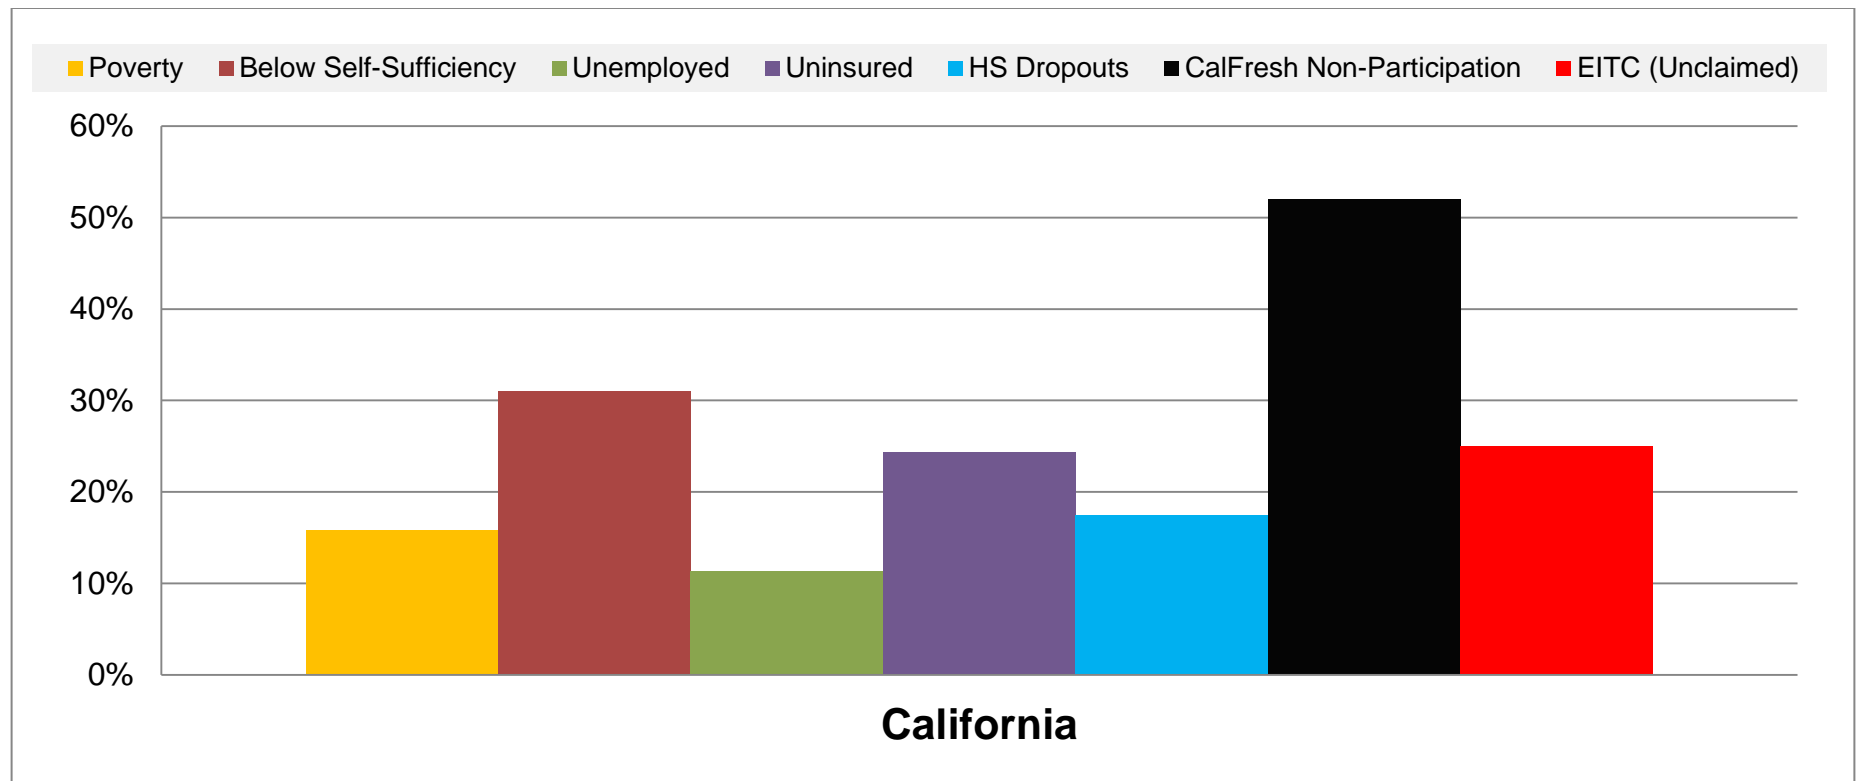

The tables below provide the following data for each county in California, grouped by local Catholic Charities Agency:

Total population:	Estimates of population by county and statewide for July 2009. (U.S. Census Bureau)
Living below the federal poverty line:	This statistic is defined as the number of people with income at or below 100% of the Federal Poverty Guidelines in 2009. (U.S. Census Bureau)
Cost of Living:	Number and percent of households below the self-sufficiency standard. The self-sufficiency standard is a county-by-county measure of the cost of living; households below this standard do not have sufficient income to cover basic expenses like childcare, transportation, healthcare, and food.
Unemployed:	The number and percent of people in California who were unemployed as of October 2011, out of the total Civilian Labor Force (N = 18.2 million, statewide). (California Employment Development Division)
NEW! Uninsured:	County-by-county estimates of the number of California residents without health insurance. NOTE: Some county data, due to small population size, was combined for the purposes of these counts.
Homelessness:	Point-in-time count of the number and percent of individuals in each county who were homeless (sheltered and unsheltered) on a given night, from the Assessment of Homelessness Annual Report (AHAR) to Congress 2010, published by HUD in 2011. NOTE: This data is not available for every county and some counties were combined for the purposes of these counts.
NEW! High School Dropout Rates:	Dropouts by grades 9 through 12 in the state of California for year of 2009-2010. The 4-year derived dropout rate is an estimate of the percent of students who would drop out in a four year period based on data collected for a single year.
Eligible for CalFresh but not participating:	2010 estimate of the number of individuals who are income eligible but not participating in CalFresh, calculated according to the formula below. (California Food Policy Advocates). Program Access Index is the participation rate as calculated by CFPA. $(\# \text{ of Income-Eligible Individuals}) \times (1 - \text{Program Access Index}^*) = \# \text{ of Income-Eligible Non-Participants}$ <p><i>NOTE: CalFresh participation presented differently from the last report. Previous report calculated non-participants based on total eligible in each county multiplied by average statewide non-participation rate of 52%. This report calculates non-participants according to county-specific participation rates. For each county, inverse of participation rate is multiplied by total eligibles.</i></p>

<p>Eligible for EITC but not receiving:</p>	<p>Number of tax returns eligible for EITC but not receiving; based on EITC Payments to California Residents, and Estimated Unclaimed EITC Payments, by County and Selected Cities (2006). (IRS) <i>* Percentage = non-participating eligibles out of total eligibles. Total eligibles = EITC returns + estimated unclaimed EITC returns.</i></p>
<p>Poverty: New State, Regional and U.S. Data:</p>	<p>This report includes a one-page summary of the most recent poverty data released by the U.S. Census Bureau in September 2011. This data is not yet available at the county level.</p>

Catholic Charities of California

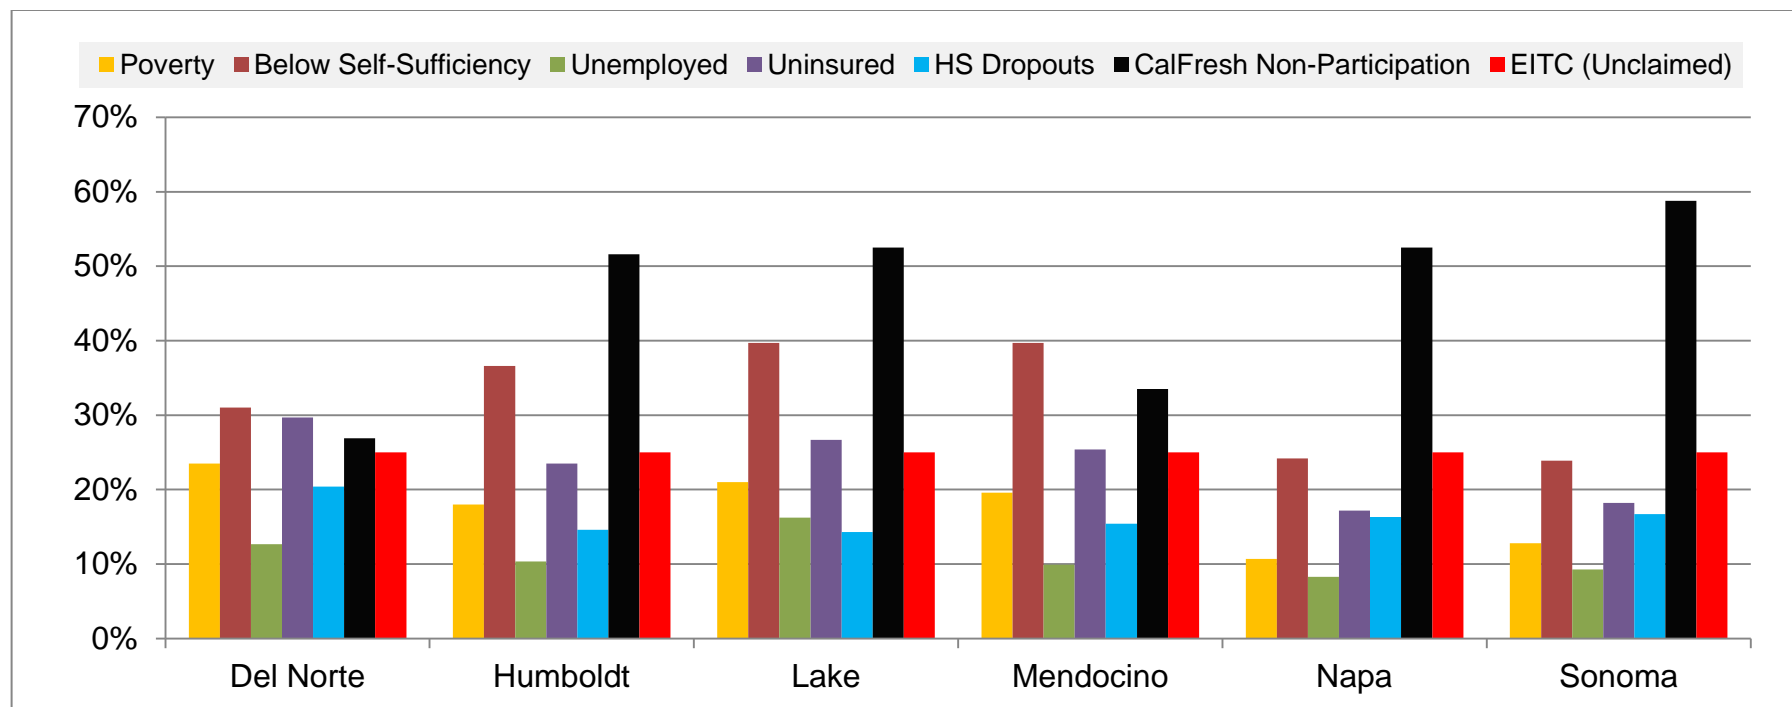

County	Total Population	Poverty		Cost of Living		Unemployment		Uninsured		Homelessness		HS Dropouts		CalFresh		EITC	
		People living below the federal poverty line		Households below self-sufficiency standard		Unemployed labor force		Individuals Lacking Health Insurance		Homeless Persons at Point-in-Time		Students not completing high school		People eligible but not participating		Unclaimed EITC returns	
		#	%	#	%	#	%	#	%	#	%	#	%	#	%	#	%
California	37,266,600	5,785,036	15.8%	2,868,283	31.0%	2,049,900	11.3%	8,356,041	24.3%	132,931	0.4%	91,074	17.4%	3,601,098	52.0%	800,649	25.0%
U.S.	312,786,620	46,180,000	15.1%			13,303,000	8.6%	49,900,000	16.3%	643,067	0.2%	4,100,000	8.1% ¹	22,022,000	33%	2,571,947	17.8%

¹ The national figure for the high school dropout rate was obtained using the *status dropout rate* method, which represents the percentage of 16- through 24-year-olds who are not enrolled in school and have not earned a high school credential, whereas the dropout rate figure for California was calculated using the *derived rate formula*, which is an estimate of the percent of students who would drop out in a four-year period based on data collected for a single year.
